

INTENDED USE

420 Purifier odor neutralizer filters the air with activated carbon and removes harmful substances from the air. It is intended for odor neutralization, and removal of toxic compounds that can result from indoor smoking.

The power cord of the device can be plugged into a 230V~/50Hz power outlet. The device should never be connected to any other kind of power outlet. Do not use the device out in the open.

SAFETY WARNINGS

The manufacturer expressly disclaims all responsibility for damage to persons or property caused by improper handling of this product or failing to comply with the instructions for use. The product warranty is void in such cases!

Unauthorized modification and/or alteration of the device is not allowed due to safety and regulatory reasons (CE).

Air purifier must not be exposed to heavy mechanical loads, extreme temperatures, direct sunlight, strong vibrations, high humidity or liquids.

Do not put any kind of object through the ventilation opening.

Sufficient airflow is essential for normal operation of the device. Never cover the ventilation openings on the device.

Air purifier is not a toy, therefore, keep it out of reach of children.

Do not leave packaging material such as plastic foil and pieces of polystyrene lying around since they can become a dangerous toy for children.

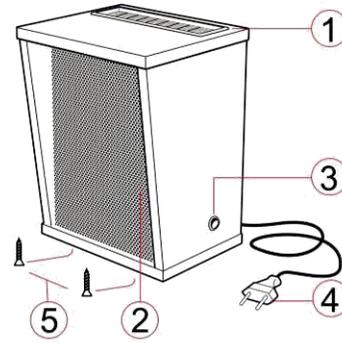

Service or repairs of the device can only be carried out by an expert or a servicing company.

Any kind of use other than the one prescribed is prohibited and can cause damage to the device and resulting other risks such as short circuit, fire, electrical shock etc. No part of the device should be modified. All plastic parts are a part of the device; therefore, their removal is prohibited. Before using the device, read the manual and keep it for guidance and help with the future use of the device

If you have any questions to which you cannot find the answer in this manual, please contact our technical service or other experts.

PARTS OF THE DEVICE

- 1 Air outlet grate
- 2 Air inlet grate
- 3 On/off switch
- 4 Power cord
- 5 Screws for filter replacement

DEVICE OPERATION

- Place the odor neutralizer horizontally or vertically on a level and robust ground.
- Make sure the openings are not covered and the airflow is unobstructed.
- Connect the odor neutralizer to a power outlet.
- To turn on the device, switch the power button on the right side of the device. While operating, a blue LED light will be on.
- When using the odor neutralizer while smoking, blow the smoke in the direction of the device. This will ensure maximum device efficiency.

HOW TO DISPOSE OF THE DEVICE

HOW TO DISPOSE OF SPENT ELECTRICAL OR ELECTRONIC EQUIPMENT

To preserve and protect the environment and prevent negative effects on the environment, preserve the health of people and reasonably use natural resources, the user must dispose of the product according to regulations. (For more detailed information, refer to your city authority competent for waste removal, communal service or manufacturer.)

TECHNICAL DATA

Operating voltage:	230V
Energy consumption:	41W
Operating temperature range:	from 0°C to 60°C
Operating humidity range:	<80% (without condensation)
Area of operation:	15-25m²
Airflow:	110m³/h
Dimensions:	355 x 265 x 233mm
